

Internet Access

Tuesday, 15 May 2007

Last Updated Thursday, 07 February 2008

Today's business communications revolve around the Internet and e-mail; they are no longer a luxury. They are a necessity! Gear 3 Technologies provides T1 Internet reliability and speed at very reasonable rates. If you could be getting a faster connection at a lower cost, we'll let you know. We can assess your situation and set up an appropriate e-mail/Internet structure for your company's needs and budget. Find out if service is available in your location, call a Gear 3 representative today!

DEDICATED HIGH-SPEED INTERNET ACCESS- Reliability. Speed. Security. Reliable- T1 Internet Access technology and deployment has been proven over decades of use and experience. It has been the Internet access of choice for businesses whose Internet access is mission critical. Gear 3 monitors your T1 Internet Connection 24/7/365. In the unlikely event your T1 Internet Service goes down, Gear 3 has a 4-hour time to repair guarantee.

Guaranteed Bandwidth - In addition to our 99.9% uptime guarantee on T1 Internet Access lines, we also offer a 30-day satisfaction guarantee; if in the first (30) thirty days after your T1 Internet Connection is installed you are dissatisfied with the performance of your T1 Internet Service, you may cancel your line without penalty and return your equipment for a full refund. T1 Internet Access lines are dedicated - the line is not shared with anybody else, which ensures you receive the bandwidth you pay for.

Low Priced - Due to more efficient use of technology, Gear 3 now offers high speed T1 Internet Access for a significantly lower price than phone companies charge. Gear 3 T1 Dedicated Internet Connection pricing includes the local loop; we also have options on purchasing or renting routing equipment. (T1 price may vary based on speed and location)

Scalable - Whether you need more bandwidth at the same location or need to add additional locations, Gear 3 Dedicated T1 Internet Access can grow with your company.

Adaptable - Gear 3 Dedicated T1 Internet Access can be used for "Voice over IP" with guaranteed bandwidth, latency and packet loss commitments. We understand that performance is crucial when doing "Voice over IP" ÿ that's why Gear 3 stands behind its products 100%. **GEAR 3 EXPRESS NET**

Gear 3 ExpressNet is Gear 3's always-on, fiber-optic infrastructure that is capable of offering on-demand multi-megabit service and providing a true broadband experience to businesses in our "lit" buildings. As a tenant, you benefit from a rare combination of total data solutions and advanced technology that can scale quickly and seamlessly to meet your needs. We provide superior customer service.

Gear 3 ExpressNet Advantage:

Rapid installation and quick availability of Internet.
Fast Friendly Customer Care by your building's dedicated team.
Advanced broadband capabilities. Cost savings!

Gear 3 ExpressNet Speeds:

We offer connection speeds ranging from 768k to 30 Mbps. We bring the power, reliability and security of fiber-optic cabling right to the customer premise. No need to worry about hardware. We've got you covered. With Gear 3 ExpressNet, your Internet access service can be truly "plug-n-play".

DSL BROADBAND ACCESS

Gear 3 DSL is geared for businesses that not only want the high-speed and low priced Internet, but also want the support, reliability and guarantee that Gear 3 provides. When you depend on Internet access, you should depend on Gear 3. DSL service along with our other professional services keeps your IT safe under "One Roof".

Benefits:

Fast - Gear 3 DSL may be up to 100 times faster than dial-up, and it's always-on, meaning you can save even more time by avoiding long dial-up times.

Affordable - We can provide your business or home with fast, always-on connections at a fraction of

the price of other dedicated internet access technologies.

Easy as 1-2-3! - Gear 3 manages the whole process, from installation to setting up your router. Furthermore, you can rely on Gear 3's outstanding customer support.

Features

Choose from a range of speeds that best suit your business needs and business budget. As your business grows and so does your need for more bandwidth, simply upgrade to a higher speed. Speeds vary by location, call 609-252-1155 (select option 1 for Sales) for a quote on your location.
