

About Us

At Gear3 our mission is to provide the best possible IT support in the industry. Our customers depend on our industry knowledge and expertise in state of the art technologies to design, implement and support their business critical computer systems, applications and networking infrastructure.

We are a service company dedicated to long lasting relationships with our customers and for many customers we function as their entire IT department. We strive to strengthen these crucial relationships with our customers and suppliers to enable us to be better prepared to provide mission critical solutions.

Some of our offerings include Small to Mid-sized Business IT Support Services, Network Configuration and Installation, Internet Services, Managed/Unmanaged Hosted Dedicated Server solutions, Remote and local backup solutions including disk recovery, Fail-over redundant systems, Data Recovery service, Web site design, development and hosting, and Peachtree Accounting consulting.
