Last Updated Monday, 27 April 2009

Gear 3's VOIP Phone System (Voice Over IP) - Gear 3 is one of best VOIP Providers in Princeton/Central New Jersey area Affordable telephone system with Enterprise level features. Features such as call queuing, digital receptionist and voicemail were only available in high end PBXs. But now with Gear 3's VOIP Phone System, the same set of features are delivered at an affordable price, which means that even small businesses get access to the same advanced features as large corporations.

With Gear 3's VOIP Phone System you get:

- IVR- System to navigate menu system - i.e. Please dial 1 for Sales, 2 for Support
- Easy to use
- Ability to work from home
- Voice Mail sent to email
- Scalable as your business grows
- Based on Opens Source Software allowing customization
- Professional Gear 3 Support
- Saving on Long Distance Calls
- Local onsite needs assessment, software installation, configuration and troubleshooting
- Paging/Parking of Calls and or Voice Mails
- Low cost for Advanced Features
- Ability to check voice mail from any computer with an Internet connecton

Gear 3 can provide you with a dedicated server, with all the hardware and software you need to get up a running fast. We not only sell the solution, we also offer on-site setup and configuration along with maintenance.

Work from home? Gear 3 technicians can setup remote locations, so home users will appear as if inside the office. Professional voice recordings are also available; some examples can be heard here. Technical Requirements of VOIP Server

Internal network (LAN) must be direct runs and wired professionally. Direct runs or "home runs" indicate that the network run is not spliced with inexpensive hubs or switches. Gear 3 can survey your current network infrastructure and let you know if your internal network or LAN can support our system. If any network wiring needs to be re-wired or upgraded Gear 3 wiring division is more then equipped to bring your network up to standards.

Pricing Options: (additional setup fees may apply) Option A - Phone Extensions. \$39 per Phone Extension per Month - unlimited calls, one rate. Gear 3 provides, hosts and manages VOIP server hardware/software. This is best for under 10 phone extensions.

Option B - Phone Lines. (Dedicated server is required) \$49 per Phone Line per Month - Number of Lines equals number of simultanous calls - Unlimited calls, one rate. Number of phone extensions using phone lines doesn't matter. This is best for 10 phone extensions and above. Benefits of Gear 3 hosts/houses your VOIP service:
 Lower intial cost. • Server is managed, monitored and backed up by a UPS and generator • Internet Bandwidth is non-issue • Power issues or Internet issue at client location will not leave phone service down - Callers could still leave Voicemails • Plus many other benefits when VOIP server is hosted by Gear 3!

In all scenarios, client is responsible for purchasing SIP enabled phones, from us or elsewhere, as well as tech time to configure phones if needed. International calls are additional.

To find out more call a Gear 3 representative for more details and benefits of moving to VOIP!
